

SIDDESH KAMBLE

(315) 450-9024 | Syracuse, NY | sskamble@syr.edu | [linkedin.com/in/siddesh-kamble](https://www.linkedin.com/in/siddesh-kamble)

EDUCATION

Syracuse University – Master of Science in Computer Science

Dec 2025

Coursework: Design and Analysis of Algorithms, Applied NLP, Introduction to AI, Database Management Systems.

Sardar Patel Institute of Technology – B.Tech in Computer Engineering

May 2021

Coursework: Advanced Data Structures, Artificial Intelligence and Soft Computing, OOP, Big Data Analytics.

TECHNICAL SKILLS

Languages: Python, Java, Golang, R, RUST, JavaScript/TypeScript, SQL, DAX

Frameworks: React, Next.js, Node.js, Express, Django, PyTorch, TensorFlow

Databases: MySQL, PostgreSQL, SQL Server, MongoDB, SQLite

Cloud & Tools: GCP, AWS, Docker, Kubernetes, Postman, Prisma, MLflow, Git, n8n, JIRA, VS Code

EXPERIENCE

iConsult Collaborative – Software Developer

Jan 2025 – Present

- Designed and implemented a scalable **Next.js + MySQL** system to process 1,000+ applicant records, reducing end-to-end workflow latency by 60% through query optimization and API restructuring.
- Built automated **GCP pipelines** (Cloud Functions, Cloud Run, Cloud SQL) for ingestion, validation, and reporting, improving system reliability and eliminating manual data processing.
- Delivered **React dashboards** with real-time metrics using server-side data fetching and optimized state management, accelerating stakeholder decision cycles.
- Drove engineering quality by mentoring junior developers on schema design, code reviews, and API best practices aligned with industry standards.

Quantiphi Inc – Conversational Bot Engineer

Jul 2021 – Oct 2023

- Developed production-grade **Dialogflow ES/CX** chatbots and IVR agents serving 500+ users across web, mobile, and telephony.
- Built an AI-driven psychology training assistant by integrating **Dialogflow CX with Soulmachines Digital Human**, enabling 200+ students to run interactive, scenario-based simulations.
- Partnered with UX, product managers, and engineering teams to ship multi-channel conversational systems with high uptime and low error rates.
- Created internal tooling and enablement material for 50+ engineers, standardizing NLP pipeline design, versioning, and deployment processes.

Markytics – Data Science Intern

Jan 2021 – Jul 2021

- Engineered Python models for financial risk scoring across 10,000+ loan accounts, leveraging feature engineering, model validation, and automated scoring pipelines to reduce manual review effort.
 - Built **Power BI and Google Data Studio** dashboards for forecasting and campaign analytics, enabling data-driven decision-making for cross-functional teams.
 - Developed Django modules integrated with ML components, enabling non-technical teams to access predictions and insights through a clean API layer.
 - Ran **A/B tests and predictive analytics**, improving campaign conversion rates by 18% using statistically validated experimentation.
-

PROJECTS

Real-Time Suspicious Activity Detection (Transfer Learning) — University of Mumbai, India

- Curated a 94GB surveillance dataset and trained a CNN-based classifier reaching **89% accuracy**, optimizing preprocessing for GPU throughput.
- Applied transfer learning using state-of-the-art architectures to reduce compute cost and training time by 40%.
- Published in IEEE ICCCNT (IIT Kharagpur).

Thermal Imaging Engagement Analysis — University of Mumbai, India

- Built a thermal-image processing pipeline for 500+ subjects, applying deep-learning-based feature extraction to detect engagement signals in real time.
 - Trained CNN classifiers achieving **92.35% accuracy**, optimizing hyperparameters for generalization across varied thermal environments.
 - Presented in IEEE ICECA.
-

CERTIFICATIONS

AWS Developer Associate — Oracle GenAI Engineer — Certification in Core Java — SAP Overview
